Global Healthcare Crisis: 1.8 Crore Workforce Shortage

The global healthcare sector - the world's largest employer - is entering a phase of sustained workforce shortage, with a projected **1.8 crore shortfall by 2030***. This shortage is increasing pressure on healthcare systems worldwide, affecting service capacity, access to care & patient outcomes.

To bridge this deficit, **many countries have expanded immigration pathways** to attract trained healthcare professionals. With one of the world's youngest populations, India is uniquely positioned to contribute to this rising global demand for skilled healthcare talent.

Allied & Healthcare Professionals and Nurses: The Backbone of Healthcare

Allied & Healthcare Professionals (AHPs) and Nurses together form nearly **85% of the global healthcare workforce**, delivering the majority of patient care. As shortages intensify, a significant share of global vacancies continues to emerge across these roles.
